Summary

Backend-focused software engineer with 4+ years of experience architecting and scaling Node.js systems serving 300,000+ users, including government portals for Haryana State. Strong expertise in API design (REST & GraphQL), database performance, and cloud infrastructure on AWS, with proven ability to own systems end-to-end from architecture through deployment and automation.

Technical Skills

Backend: Node.js, Express.js, NestJS, TypeScript, JavaScript, Python, Java, REST, GraphQL, gRPC

Databases & Messaging: PostgreSQL, MongoDB, MySQL, Redis, RabbitMQ

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch, RDS), Docker, Jenkins, Grafana, CI/CD, Nginx, Linux

Frontend & Tools: React.js, Next.js, Git, Postman, Agile/Scrum

Experience

Software Developer

08/2022 – 11/2025

Medha India

- Architected and built the backend for the **Medha Learning Program**, a suite of 4 microservices (SIS, DST, Pehel, Meet) serving **300,000+ users with 30,000+ daily active users** on Node.js, PostgreSQL, GraphQL, Redis, and RabbitMQ, deployed on AWS.
- SIS:** designed the GraphQL API and PostgreSQL schema for a production-grade Student Information System tracking ITI college students across multiple Indian states from enrollment through certification; implemented RBAC with JWT authentication for multi-institution access; introduced Redis caching in front of PostgreSQL, reducing data retrieval latency by **30%**; used gRPC for internal service-to-service communication (Node.js, PostgreSQL, GraphQL, Redis, gRPC).
- DST:** solely architected and delivered a Haryana Government ITI analytics portal with **20,000 daily active users** and zero critical post-launch incidents; automated batch data processing pipelines, cutting manual admin workload by **40%** (Node.js, Express, Prisma, PostgreSQL, AWS).
- Pehel:** designed the bulk-import backend for onboarding students and institutions via Excel, reducing reporting turnaround time by **35%** (Node.js, AWS S3, PostgreSQL).
- Meet:** built the backend for a pan-India job portal matching students to client-listed job opportunities by preference and location (Node.js, GraphQL, Redis, RabbitMQ for async notifications).
- Also built the backend for two internal Medha tools — an HR management portal and a finance management app (Node.js, Express.js, PostgreSQL, GraphQL).

Software Developer

11/2021 – 08/2022

Diagright India

- Optimized RESTful APIs for user management and analytics, cutting average response time by **25%** while handling 10,000+ daily requests through caching and query tuning.
- Built the backend powering a real-time GPS tracking system for 90+ field agents, integrating with the Google Maps API and improving operational coordination and response times by **35%**.
- Integrated backend APIs into the company's Angular website.

Software Engineering Fellow

04/2021 – 10/2021

Hyperverge Academy India

- Built full-stack MERN applications, gaining hands-on expertise in REST API design, state management with the React Context API, and database integration.

Education

St. Andrews Institute of Technology & Management

06/2024 – 06/2026 (Expected)

Master of Computer Applications (MCA) India

- Coursework: Advanced Database Systems, Cloud Computing, Software Architecture

MAHGU

07/2019 – 07/2022

Bachelor of Computer Applications (BCA) India

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, SDLC
