Summary

Frontend-focused full-stack engineer with 4+ years of experience building React.js applications and dashboards used by 300,000+ users, including multi-institution government portals for Haryana State. Strong expertise in React.js, TypeScript, Next.js, and GraphQL, with a solid Node.js backend foundation for building the APIs that power those interfaces end-to-end.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, Angular, Redux, GraphQL

Backend & APIs: Node.js, Express.js, NestJS, REST, GraphQL, Python, Java

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & Tools: AWS (S3, EC2, Lambda), Docker, Jenkins, Grafana, Git, Postman, Agile/Scrum

Experience

Software Developer

08/2022 – 11/2025

Medha India

- Built and maintained the React.js interfaces across the **Medha Learning Program**, a suite of 4 microservices (SIS, DST, Pehel, Meet) serving **300,000+ users with 30,000+ daily active users**, consuming a GraphQL API layer over Node.js and PostgreSQL.
- SIS:** built multi-institution React.js dashboards used by admins, state operators, and students to track a student's journey from enrollment through certification; implemented role-based UI rendering and access control on top of JWT authentication so each user role saw a tailored view; consumed a GraphQL schema that let each dashboard fetch exactly the fields it needed, cutting perceived load time.
- DST:** built the React.js frontend for a Haryana Government ITI analytics portal used by **20,000 daily active** state operators, translating raw student status data into digestible reports and visualizations.
- Pehel:** built the onboarding dashboard UI, including a bulk Excel-import flow for onboarding students and institutions in a single pass, reducing reporting turnaround time by **35%**.
- Meet:** built the student-facing UI for a pan-India job portal, letting students filter and browse client-listed job opportunities by preference and location.
- Also built the React.js frontends for two internal Medha tools — an HR management portal and a finance management app.

Software Developer

11/2021 – 08/2022

Diagright India

- Built a real-time GPS tracking dashboard for 90+ field agents using React.js and the Google Maps API, improving operational coordination and response times by **35%**.
- Built UI components for the company's Angular website and integrated them with backend APIs for real-time data.
- Worked with RESTful APIs powering the dashboard's analytics views, contributing to a **25%** reduction in average response time while handling 10,000+ daily requests.

Software Engineering Fellow

04/2021 – 10/2021

Hyperverge Academy India

- Built full-stack MERN applications, gaining hands-on expertise in REST API design, state management with the React Context API, and database integration.

Education

St. Andrews Institute of Technology & Management

06/2024 – 06/2026 (Expected)

Master of Computer Applications (MCA) India

- Coursework: Advanced Database Systems, Cloud Computing, Software Architecture

MAHGU

07/2019 – 07/2022

Bachelor of Computer Applications (BCA) India

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, SDLC
