Summary

Full-stack software engineer with 4+ years of experience delivering scalable backend systems and web applications. Built platforms serving 300,000+ users, including government portals for Haryana State. Strong expertise in Node.js, TypeScript, React.js, PostgreSQL, GraphQL, and AWS, with proven ability to own products end-to-end from architecture and API design to deployment and automation.

Technical Skills

Languages & Frameworks: Node.js, JavaScript, TypeScript, Express.js, NestJS, React.js, Next.js, Angular, Python, Java

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch, RDS), Docker, CI/CD, Nginx, Linux

Databases: PostgreSQL, MongoDB, MySQL, Redis

Tools: Git, Postman, GraphQL, RabbitMQ, gRPC, Agile/Scrum

Experience

Software Developer

08/2022 – present

Medha

India

- Built and maintained the **Medha Learning Program**, a suite of 4 microservices (SIS, DST, Pehel, Meet) serving **300,000+ users with 30,000+ daily active users** on a MERN + PostgreSQL + GraphQL + Redis + RabbitMQ stack, deployed on AWS.
- SIS:** production-grade Student Information System tracking ITI college students across multiple Indian states from enrollment through certification; implemented RBAC with JWT authentication and multi-institution React.js dashboards; reduced data retrieval latency by **30%** via query optimization and indexing (Node.js, React.js, PostgreSQL, GraphQL, Redis, gRPC).
- DST:** solely architected and delivered a Haryana Government ITI analytics portal onboarding **15,000+ students** with **20,000 daily active users** and zero critical post-launch incidents; automated batch data pipelines, cutting manual admin workload by **40%** (Node.js, Express, Prisma, PostgreSQL, React.js, AWS).
- Pehel:** built bulk onboarding workflows for students and institutions via Excel import plus a standalone onboarding dashboard, reducing reporting turnaround time by **35%** (Node.js, React.js, AWS S3, PostgreSQL).
- Meet:** built a pan-India job portal matching students to client-listed job opportunities by preference and location (MERN, GraphQL, Redis, RabbitMQ).
- Also built two internal tools for Medha operations — an HR management portal and a finance management app (React.js, Node.js, Express.js, PostgreSQL, GraphQL).

Software Developer

11/2021 – 08/2022

Diagright

India

- Built a real-time GPS tracking dashboard for 90+ field agents using React.js and the Google Maps API, improving operational coordination and response times by **35%**.
- Optimized RESTful APIs for user management and analytics, cutting average response time by **25%** while handling 10,000+ daily requests through caching and query tuning.
- Contributed to the company's Angular website, implementing UI components and integrating backend APIs.

Software Engineering Fellow

04/2021 – 10/2021

Hyperverge Academy

India

- Built full-stack MERN applications, gaining hands-on expertise in REST API design, state management with the React Context API, and database integration.

Education

St. Andrews Institute of Technology & Management

06/2024 – 06/2026

Master of Computer Applications (MCA)

India

- Coursework: Advanced Database Systems, Cloud Computing, Software Architecture

MAHGU

07/2019 – 07/2022

Bachelor of Computer Applications (BCA)

India

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, SDLC
